# The Cellar

By: Leo Chaparro

*The Cellar*, by Natasha Preston, is a young adult thriller about a young girl named Summer, who was suddenly kidnapped by a mysterious man who was following her around the park. The man appears and startles Summer, but what she didn't know was that he called her Lily and constantly stared at her for a while. Summer claims she is the

wrong girl, but he just kept saying she was Lily.

Before Summer can turn around and leave she is attacked by the mysterious man, and then is thrown into the back of his van. Summer tries to call for help, but no one can hear her and she is scared to death. Then the van stops, and the man then drags her to a mysterious door behind a bookshelf and throws her in a cellar with three other girls. The girls introduce themselves as Rose, Poppy, and Violet and now they have a new girl to join them, but her name is now Lily. Rose explains to Summer that she is the fourth flower in Clover's new family. Now Summer knows his name, but is still confused about why he chose her and why he brought her with him.

As Summer tries to start getting used to her new home, she is still afraid to talk to any of the girls or to

even eat. Clover explains to Summer that the reason he chose them was because he wanted to protect them, saying that they were pure and not disgusting like those other girls that walk the streets and try to ruin people's lives.

Summer faces problems as Clover randomly brings girls down to the cellar and kills them in front of the girls, who are used to watching this. Rose explains that Clover does this to help them learn that the outside world is full of inappropriate girls that must be punished, at least that's what he always tells them. Now that Summer knows that Clover is not only a kidnapper, but a murderer as well, she comes up with a plan to kill Clover and escape.

Summer explains her plan to the girls but they disagree. Summer asks them why they won't go with her plan, and they explain to her that they can't escape or even try, because Clover will punish them. Rose tells Summer stories about past girls who tried, but they failed and ended up dead. As Summer hears this she has to decide if she should escape or not.

So, she will try to escape with or without the others and return to her family, because what Clover doesn't know is that flowers don't last forever. I would give this book 5 stars and recommend it to people who like thrillers, because this book will keep you on the edge of your seat!

## Call of Duty

By: Parker Branham

Call of Duty is a game loved by many people around the world. It has a wide variety of games for PlayStation, Xbox, PC, and mobile devices. Call of Duty is a first-person shooter game that has an array of game modes, such as campaign, multiplayer, or even zombies.

The three companies that develop the Call of Duty franchise games: Treyarch, Infinity Ward, and Sledgehammer games, have created different game modes but they are extremely similar. However, the Battlefield franchise only has two game modes, campaign and multiplayer. As for how many games were made the Call of Duty franchise has 23 games (including mobile) and counting! Battlefield only has six games and no mobile ones.

There is also downloadable content (DLC) available for most of the games, but out of the two Battlefield has the MOST. Call of Duty's multiplayer game modes require no dlc, there are 10 game modes in the core playlist that require no dlc whatsoever. In Battlefields multiplayer game modes there are 7 game modes that require no dlc, all the rest require dlc you must pay for.

I don't think it really matters which game you play, but if you would like to spend less money and have more fun than be stressed with spending money on dlc, I suggest you play Call of Duty for quick, fun, and less expensive gameplay.

## Battlefield

By: Pablo Nunez

Battlefield is a great game., and I have experienced it. But I will tell you things about the game that you may not know.

Battlefield is a first-person shooter, but you get to customize your character more than in Call of Duty, and you also get to customize any vehicle you get in to. The vehicles in the game vary by map, and if your team is winning or losing. There are four different classes you can play: assault, engineer, support, and recon. They all have their perks: assault gives health, engineer repairs vehicles, and support gives out ammo,.

Battlefield has no continuing story, there are different stories for each game. The setting and characters for Battlefield depend on which game you are playing in the series. The first Battlefield game was released in September 2002, and the first Call of Duty game was released in October 2003, which makes the Battlefield series slightly older.

Three things set them apart: the player count, the setting, and how much the franchises are worth. The setting for Battlefield is in the present or past but the setting for Call of Duty right now is in the future. The player count for Battlefield is around 50,000 or 60,000 players, but the player count for Call of Duty is around 100 million. The Call of Duty franchise is worth over \$3 billion but the Battlefield is worth over \$3 billion, too.

In conclusion I think Battlefield has more content than Call of Duty, but Call of Duty has way more players than Battlefield .

## Teacher of the Month

By: Micah DeLaTorre

The Teacher of the month I have chosen is Ms. Weinstein. I have chosen her because she is a very good science teacher and can always put a smile on someone's face. Ms. Weinstein was born March 30, 1990. Her full name is Danielle Erin Weinstein.

Before Ms. Weinstein even thought about being a teacher she played soccer. To this day she still loves it and plays on an adult team. When she was in high school she realized that she wanted to be a teacher, because she loved working with students. What inspired her to teach is when she was working as a EMT she loved to help and teach the mentally challenged to learn. She wanted to become a science teacher because she was very interested and it never seemed to get old to her.

Mrs. Weinstein is 5'7" and is currently 25. She grew up in Chino Hills, and does not own any pets but she does have a younger sibling. She is currently in college working to get into law. She is a very good teacher and is always energetic. If notes gets boring she might say a funny comment or even put on music. Ms. Weinstein is a very good teacher and I think no eighth grader finds her boring.

## Why Play Sports?

By: Steven Munoz

Playing sports not only makes you active, but it makes you healthier and happier and you also benefit from being physically fit. If you play more than three times a week it makes you healthier. It doesn't matter what sport you play as long as you're active actually, you have to like it too so that you have fun playing it.

Sports help you build confidence and lets you interact with other people to build social skills. Sports will help you academically because you need to have

good grades in order to participate in sports besides if one day you want to play in any professional leagues.

You also get the proper exercise your body needs to keep you healthy so you live longer and stronger than people who aren't active as well as getting the oxygen your body needs. You have your cardio exercise for your heart and weight training to give you strength because as you get older you can lose strength.

So, it really doesn't matter what sport you play as long as you are active and enjoying what you do and most importantly keeping yourself hydrated at the same time.

## Most Expensive Cars

that it has a computer controlled transmission and its shift time is 150 milliseconds.

## My Generation!!!

By: Nery Juarez-Ceballos

Teens are...finish the sentence. Many adults believe teens are disrespectful, lazy, and narcissistic. Are teens just some rebellious kids looking for attention or are they normal human beings going through a phase?

Some adults believe that teens are just lazy kids with conceited attitudes. Yes we have our moments but does that really define us? I've also heard the word careless come from adults. Maybe most teens don't have much interest in global warming or politics, but they do care. Teens are interested in different topics than adults.

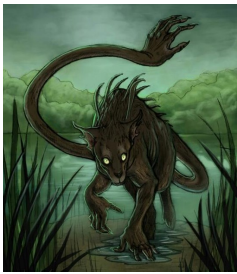

Yes, I can't avoid the fact that this generation of teenagers is technology based. We were born in an era where things are much easier. We don't have to read a book to figure something out. All we have to do is Google it. We have the world in these small devices that fit in our pockets. Teens are addicted because texting, posting, and tweeting is their way to stay I touch with the world. Maybe us being technology based is not such a bad thing. Maybe it's one of our benefits.

Take a second to think about it from our perspectives. Would you like someone judging you when you are simply trying to figure yourself out? You can't just judge a book by its cover. People can't just stereotype teenagers with their few real encounters.

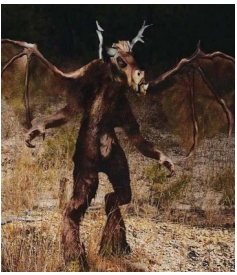

In conclusion, many negative things are said and thought about us teenagers. Some main words I have heard are disrespectful, lazy, and narcissistic. We are not disrespectful we are speaking our minds. We are not lazy we are just in need for someone's attention. We are not narcissistic we are trying to figure out who we are. Don't let some bad impression completely ruin your thoughts on generation Z.

Its waterproof fur clumps up to create spikes. The creature has an unnatural liking for human flesh, nails, eyes, and teeth. They believed that the creature lived in or by the water. The creature supposedly protected fish by killing off fisherman, but later legends had it drowning anyone near the water.

She sheltered it in the house and on a stormy night, the child flapped it's arms, which turned into wings, and escaped out the chimney and was never seen by the family again.

**Curupira-** The Curupira lives in the forests of Brazil, it has bright red hair, resembles a man, but its feet are turned backwards. The creature uses its backwards feet to confuse hunters and travelers. He is a protector of the environment, he defends plants and animals from hunting, fishing, and other harmful actions.

# Snapchat

By: Meagan Navarro

What is Snapchat? Snapchat is a social media app where you can send picture and videos. The app was created by Evan Spiege, Bobby Murphy, and Reggie Brown. All three men created Snapchat while

they were students at Stanford University, the app is rated 12+ and it also has 2.6 stars out of 5 stars.

Snapchat has cool features, like when you hold your face on the screen you get some funny faces. You can also make a video on Snapchat fast, super fast, slow, and reverse. Those are some of the things Instagram does not have that Snapchat does. By the way add me on Snap chat @megolina\_3. The version is 9.20.0.0. The last time it was updated was Nov. 19, 2015.

On Snapchat there are 4 pages. The first page is on the left where the conversations are from friends. The second page is where you can snap pictures and send them to your friends. You can also post them so everyone can see. The third page on Snapchat has other posts from the people you follow; they're also known as stories. The fourth page is located on the second page, but instead you scroll to the top. That page has settings.

Also when you click a friend's nickname it shows their snapchat score. A Snapchat score is a score Snapchat gives you depending how much you use it and how you use it. Users from the app were sending 2 billion videos and pictures per day.

The company has a valuation of \$10-\$20 billion according to Wikipedia. Instagram, on the other hand you can post pictures and videos. You can also text, but I prefer Snapchat. In my opinion, I think Snapchat is better than Instagram. Which do you like?

# Instagram

By: Mariya Roman

Instagram? What is it? Instagram is an online app where you can share photos and videos. Instagram was released in the year of 2010. This app was created by Kevin Systrom and Mike Krieger. Instagram is rated 4.2

out of 5 stars.

Instagram has tons of stuff you can do on it. Instagram has 5 pages. The first page shows where people post pictures. The second page shows where you can explore and find new people to follow and explore other users' posts. The third page is where you can post a picture that you choose. Once you've taken a photo or have selected one from your phone or ipod, you can edit it by applying filters. First you tap the filter you'd like to apply. Next tap the filter again if you want to adjust filter strength up or down using the slider. Then tap the check to save your changes. Finally, tap next to add a caption and location to share your photo. The next page is called activity. Activity helps you stay up-to-date on recent activity from people you are following. Finally the last page is your profile aka your feed. This page shows all your posts, how many followers you have, and who you are following.

Here are some fun facts about Instagram: Did you know that Kylie Jenner is the celebrity with the most selfies? Did you also know that Nike is the most followed brand? Yes, Justin Bieber is the most followed person.

Snapchat on the other hand has great features and you can also post pictures and videos but they only last 24 hours. In conclusion this article explains what Instagram is and why I like Instagram better than snapchat. Which do you like better Snapchat or Instagram? Don't forget to follow me on Instagram @yogurlmariya

# Do you YouTube?

By: Sammie Hughes

Are you always bored? Have you just wanted something to laugh at, or maybe a DIY to do? Like me, you'd probably look on YouTube. But then you see all these different videos, and wonder which one to choose. I've had this problem a ton of times, but finally found YouTubers I love! I researched a bit, and found 5 YouTubers I recommend. They post daily, are super funny, do cool DIYs and tips, and will always have you wanting to watch them.

**1.) Jc Caylen and Kian Lawley** — I totally recommend these two hilarious guys because they always bring a smile to my face and are my favorite! They have currently +1m subscribers and over 90 hilarious videos. Kian and Jc were on YouTube before this channel. They actually used to be on another channel before this called "Our Second Life" a.k.a O2L. There were 6 members in their amazing group: Sam Potoroff, Trevor Moran, Ricky Dillon, Jc Caylen, Kian Lawley, and Connor Franta. YouTube: KianandJc

**2.) Ricky Dillon** — The cool part about Ricky is that he used to be in the group Our Second Life. Even though they aren't in a group anymore, they still guest star in each other's videos! I recommend Ricky because he is sweet, honest, and does super hilarious videos of different challenges with other YouTubers, taste-testing foreign candies/foods, and anything else you can think of. But you can always count on him to make you smile! Every one of his +2m subscribers counts on him to post a video every Sunday.

Ricky even sings his own song, which you can purchase in iTunes. My favorites that you should listen to are "Live it Up" and "Ordinary." Ricky just wants to make us have a good time listening to his music and laughing and enjoying his videos. His first album is going to be in stores January 15, 2016!! YouTube: RickyDillon
