

Help us earn free Surface Pro 3 tablets!

Congratulations! Your district has been accepted into an exclusive Bing in the Classroom pilot!

As part of this limited pilot, your district will accrue credits towards free Surface Pro 3 devices for every Bing search on the district network. This promotion is running now, and will remain live through May 29th.

Every time you use Bing in your classroom, you're helping get free devices into your schools!

Here are some ways you can incorporate search in the classroom:

Use Bing.com for ad-free, safer, more private search

Your students now have the choice of ad-free, safer, more private search.* When they use Bing.com on the school's network, they will experience ad-free Bing search results, strict filters to help prevent adult content, and enhanced privacy protections.

Teach digital literacy with daily lesson plans

Bing in the Classroom lesson plans teach critical thinking and search skills in short, fun activities that align with Common Core standards and are available in K-4, 5-8 and 9-12 levels.

Find them daily at www.bing.com/lessons

Play Mystery Skype, the global guessing game

Teach geography, cultural studies, and more with Mystery Skype, our global guessing game. With Mystery Skype, your class will connect with another classroom around the world and use 20 questions and Bing maps to guess its location.

Learn more at education.skype.com/mysteryskype.
