

Helping solve the puzzle

Mission Impuzzable - Born to Stand Out!, a team that included several Rolling Ridge and Country Springs elementary school staff members, families and students, participated last weekend in the annual Autism Speaks Walk at the Rose Bowl in Pasadena.

The group walked in support of students and families affected by autism. Mission Impuzzable also raised \$630 for autism research through collection jars at the two schools.

The team name refers to the symbol for autism, a puzzle piece, which was designed by a member of the National Autism Society to reflect the mystery and complexity of the Autism Spectrum Disorder.
