

Integrated Math I**Course Description:**

Throughout the school year students will explore concepts in Algebra, Statistics and Geometry. The first semester will focus on Algebra standards, specifically linear functions. Problems will be based on real-world scenarios that highlight the practical use of algebra in the real life. Students will learn to reason abstractly and quantitatively. In addition, students will acquire the ability to construct viable arguments and critique the reasoning of others. Last, students will learn to model with mathematics and use appropriate tools strategically.
