

Middle Years

Working Together for School Success

Short Stops

Take good risks

Encourage your tween to try an activity that appeals to her, even if she's a little nervous. Maybe she wants to join the cross-country team but hasn't run longer distances. Or perhaps she's interested in the improv club but is hesitant about public speaking. Stepping out of her comfort zone will stretch her abilities and build confidence.

Agree to disagree

If your usually agreeable child starts poking holes in your opinions, that's a sign his reasoning skills are developing. Try not to take it personally, and ask him to share his views respectfully. He'll learn that it's okay to disagree, as long as he's polite about it.

Puzzle me this

Crossword puzzles boost your tween's vocabulary. Have her print free puzzles she finds online or get crossword books from a dollar store. Or she and her friends could make crosswords for each other on graph paper or with a website like puzzlemaker.discoveryeducation.com.

Worth quoting

"The way to get started is to quit talking and begin doing." *Walt Disney*

Just for fun

Q: Why did the bird build a nest on the car?

A: She knew they would be moving soon!

A good attitude = more learning

Starting the year with a positive attitude about school goes a long way toward a student's success. Inspire your tween to develop a winning outlook with these strategies.

Look for positives

Your middle grader can find something interesting about every class. Suggest that he start a list of fun facts, one from each class every week. After a biology lesson on genetics, he might write, "I had a 50 percent chance of having blue eyes since Mom's are brown and Dad's are blue." Encourage him to share his discoveries with you.

Celebrate achievements

Tell your tween to congratulate himself on a job well done. Maybe he earned a higher score on this week's vocabulary quiz than he did on last week's. Or perhaps he picked a topic for his history paper, even though he was tempted to

put off getting started. Saying "I did it!" will make him feel good about himself and motivated to keep working hard.

Seek help

Successful students know how to get help when they face challenges. For example, your child could post a schedule of teachers' office hours or homework-help sessions in his locker. Then if he's struggling, he can sign up for a slot. Having a plan in place will help him stay upbeat. 👍

Fall family fun

Strong parent-tween relationships help kids resist risky behaviors *and* make family life more enjoyable. Try these ideas.

■ **Outings.** Ask your child to find outings that sound fun, such as a fall festival or a paint night. For ideas, she could look in the newspaper or check library and community center websites. *Tip:* Suggest that she ask classmates where their families like to go on weekends.

■ **Projects.** Let your middle grader plan family projects. Perhaps she'll suggest a garage sale. Work together to gather books, housewares, and toys you don't need anymore. She can help to advertise the sale, price items, and greet customers. 👍

Wanted: Involved parents

What does parent involvement look like in middle school? While you probably won't be volunteering in your child's classroom, she still wants your support (even if she doesn't act like she does). Consider these tips for being a partner in her education.

At school. Make it a priority to attend school events like curriculum nights and school plays. Also, look for ways to help that are related to your tween's activities. If she plays in the band, you could volunteer to set up for a concert. If she belongs to a book club, you might offer to shelve library books and talk to her afterward about

books you noticed. Or if she's an athlete, maybe you'll work at the concession stand during sporting events.

At home. Offer to quiz your middle grader on material she's studying or to look over a paper she's working on. To stay in the loop about what's happening in school, read the website regularly and sign up for email or text alerts. Mention the announcements to your child so she knows you're interested in her school. 👍

Q&A Getting started with community service

Q My son is required to complete community service hours this year, but he can't decide what to do. How can I help him?

A Doing community service will let your son help others and gain work experience. The main office or his school counselor may have a list of places where he can volunteer. He could also ask friends, relatives, and neighbors for ideas.

Then, suggest that he choose a job that matches his interests—he'll get more out of it that way. For example, he might participate in a beach cleanup if he's concerned about the environment. Or if he likes working with younger children, he may play games or read with little ones at a homeless shelter while their parents attend job training.

Finally, encourage him to keep track of his work, including names of supervisors, so he'll receive credit—and even have references for a job someday. 👍

OUR PURPOSE

To provide busy parents with practical ideas that promote school success, parent involvement, and more effective parenting.

Everyday engineering

From shoes and clothing to appliances and electronics, just about every product your tween uses was designed by engineers. Help him discover how engineering affects his daily life with this activity.

1. Encourage your child to consider the engineering involved in his favorite products. Maybe his running shoes absorb impact, the smoothie maker purees big chunks of fruit, or his jacket repels rain.

2. Now let him pick a product to redesign. He could decide to add another layer of foam to his shoes. First, he should run a block and rate his comfort on a scale of 1–10. Then, he can add foam, run another block, and rate his comfort again. What happens if he adds even more foam? How much might be too much? 👍

Parent to Parent

The “elevator speech”

When I was looking for a job, I discovered an interesting technique for “selling” yourself in an interview: the “elevator speech.” I shared the idea with my daughter Susan, thinking she could use it to write summaries or make points during class discussions.

I told Susan to pretend she was going to ride an elevator with me and summarize the novel she's reading in

30 seconds or less—about the time it would take to ride from the ground to the top floor of a building.

Susan jotted down what she wanted

to say. At first, it took her almost 3 minutes to read it. But she kept trimming her summary until it was about 30 seconds long.

Then, she read it aloud to me. She got to the point quickly, and now she plans to try the strategy in class. 👍

Middle Years

Working Together for School Success

Short Stops

Making an entrance

Teach your child to enter a room confidently. Have him practice walking into the kitchen or living room with his back straight and head high, then greeting you while looking you in the eye. He'll make a good impression on others and feel more self-confident.

Count on counselors

Remind your middle grader that her school counselor is there to help her in all kinds of ways. She might ask the counselor about opportunities that match her interests, such as an engineering competition or a writing workshop. Her counselor can also listen if your tween needs help with issues like stress or relationships.

Proofing around town

Here's an easy way to show your child why proofreading is important. Together, look for signs on highways or buildings that contain punctuation or spelling errors or confusing wording. *Examples:* "Sport's Store." "Tables for eating customers only." Who can find the funniest example—and then tell how to fix it?

Worth quoting

"We will be known by the tracks we leave behind." *Dakotan proverb*

Just for fun

Q: I have a neck but no head, and I wear a cap. What am I?

A: A bottle.

Brain-friendly studying

Active study strategies like drawing, moving around, and teaching information to others help to cement material in your tween's brain. They also make studying more fun! Share these techniques.

Make a meme

Encourage your middle grader to create memes inspired by topics she's studying. For Newton's laws of motion, she could draw herself as a soccer goalie blocking a shot. This shows that an object in motion (the ball) stops when a force (the goalie) acts upon it. Her caption? "Thanks for the win, Newton!"

Get moving

Combine fitness with studying. Have your tween list six movements, such as lunges, burpees, and toe touches, and number them 1–6. As she finishes studying each page or section, she can roll a die and review out loud while doing the matching exercises (describe the three branches of government as she does three lunges).

Record a podcast

If your child can teach a concept to someone else, that means she really understands it. Suggest that she record a podcast explaining an algebraic formula and share it with a classmate, for example. *Idea:* She and her friends might make a group podcast interviewing each other about a historical event or science lab. 🍌

A successful juggling act

Middle graders juggle classes, responsibilities at home, and activities. Help your tween keep all those balls in the air with this system.

Sort tasks. Each week, have your child create a three-column chart for School, Activities, and Home. Then, he could list obligations: "French essay due Thursday" under School, "Get supplies for cross-country car wash Saturday" under Activities, and "Do laundry" under Home.

Use time wisely. Your tween can choose tasks to match his pockets of time. For instance, if you say you'll take him to buy car-wash supplies in 10 minutes, he might sort his laundry in that small time slot. Then, maybe he'll start on his essay when he gets home and has an hour before dinner. 🍌

Effective expectations

Setting a high achievement bar for your middle schooler will inspire him to leap high. Follow these steps to put realistic expectations in place.

1. Decide what's doable. Perhaps your child got a C in English last year. Rather than expecting him to earn an A this year, tell him you expect him to bring up his grade.

2. Focus on what matters. Keep communication clear by saying exactly what you mean. If your middle grader wants to quit the debate team, you might say, "I expect you to stick to your commitments" rather than "You have to do debate." That means he'll need to finish the competition

then make a plan to raise it. Or he could plan to spend extra time practicing for his next debate. 🍊

season, but he can switch activities next semester if he still feels the same way.

3. Handle setbacks.

Part of meeting expectations involves making adjustments. Let your tween know not to be discouraged by one low grade or one challenging debate. Have him ask his teacher how a low score will affect his average,

Are we there yet?

Arizona, Missouri, Louisiana... does your child know where each state is located? Help her explore geography by playing this game.

Materials: large U.S. map, paper, pencil, scissors, hat, game tokens, die

Ask your middle grader to list all the states' names on a sheet of paper (she can refer to the map) and cut them apart to make 50 slips. Put the slips in a hat, and let each family member pick one.

Place the U.S. map on the floor, and have each person put a token on the state you live in. Then, take turns rolling a die and moving that number of states—with the goal of reaching the state she drew. The first player to land on her state wins. 🍊

The importance of integrity

Q I've heard that some students cheat on tests by looking up answers on their phones. How can I keep my daughter from doing something like this?

A Tweens may not consider "e-cheating" to be as serious as copying from a classmate's paper. Explain to your daughter that any type of cheating is wrong and that you consider honesty more important than high grades.

Role-play what to say if a classmate asks her to cheat, perhaps by texting answers. For instance, she could say, "I like to do my own thing" or simply "No thanks." She'll feel good about doing what's right.

Also, remind her to obey school rules for technology use like leaving her phone at home or in her locker. This will help her avoid the temptation to cheat and make it easier to resist pressure from others. 🍊

Parent to Parent On the move

When my son Rory was younger, he'd spend hours playing outside with his friends. Now that he's older, he and his buddies would rather play video games.

At his annual checkup, I asked the pediatrician how much exercise Rory needs. The doctor said children—and adults—should be active at least an hour a day. He suggested that when Rory has a friend over, I

encourage them to do something active. And he recommended that we stay active as a family, maybe by going for walks or bike rides.

Rory must have been paying attention to the doctor, because he recently invited some friends to go Rollerblading. And this Sunday after dinner, we're going to ride our bikes around the neighborhood. I'm looking forward to being more active, too! 🍊
