Statewide Assessments: Just One Measure of Sophia's Progress

California Assessment of Student Performance and Progress (CAASPP) results in English language arts/literacy (ELA) and mathematics give one measure of how well students are mastering California's challenging academic standards. The skills called for by these standards—the ability to write clearly, think critically, and solve problems—are essential for preparing students for college and a 21st-century career.

What do my child's scores mean?

There are four levels of scores for ELA and mathematics. "Standard Met" and "Standard Exceeded" are the state targets for all students.

- Standard Exceeded (Level 4)
- Standard Met (Level 3)
- Standard Nearly Met (Level 2)
- Standard Not Met (Level 1)

Score ranges for each level are different for each grade, and the standards for the next grade are higher than for the previous grade. As a result, students may need a higher score to stay in the same level as the previous year.

Personal Insight Questions

PERSONAL INSIGHT QUESTIONS

Our personal insight questions are about getting a better sense of who you are. Take time to think about your life experience, ambition, and inspiration. Then dive in and express yourself freely and openly. It's just one part of your application — but it's a great chance to introduce yourself and make an impression.

Directions: Compose a hand-written response of no more than 350 words for each of the following prompts.

1. **Describe a talent or skill that you have. Explain how you develop and use that talent or skill to serve others. Use specific details and examples in your response.** Things to consider: Why is this talent or skill meaningful to you? Does the talent come naturally, or have you worked hard to develop this skill or talent? Does your talent or skill allow you opportunities in or outside the classroom? If so, what are they and how do they fit into your schedule?
2. **Describe an example of your leadership experience in which you have positively influenced others, helped resolve disputes or contributed to group efforts over time.** Things to consider: A leadership role can mean more than just a title. It can mean being a mentor to others, acting as the person in charge of a specific task, or taking the lead role in organizing an event or project. Your leadership role doesn't necessarily have to be limited to school activities. For example, do you help out or take care of your family? Think about what you accomplished and what you learned from the experience. What were your responsibilities? Did you lead a team? How did your experience change your perspective on leading others? Did you help to resolve an important dispute at your school, church, in your community or an organization? And your leadership role doesn't necessarily have to be limited to school activities. For example, do you help out or take care of your family?
