

CLASSROOM MATRIX

	BE RESPECTFUL	BE RESPONSIBLE	BE SAFE
ARRIVAL/ DISMISSAL	Get to class on time. Be ready to work and collaborate. Keep your mask on. Remove your hats and hoods before entering.	Bring your notebook. Have your graphing calculator ready and charged. Stay focused on calculus.	Give people personal space. Follow CVUSD guidelines.
WHOLE CLASS DISCUSSION	Join in the discussion. If someone makes a mistake, help them out (you would want assistance). If you need a moment to finish your conversation, ask.	Don't raise your hand, jump in when appropriate like adults do. Don't sit there copying down everything, you will probably miss something important in the discussion.	I do not know how to have an unsafe whole class discussion about calculus.
COLLABORATIVE WORK	Give feedback both positive and negative without judgement. Accept feedback without feelings.	Pull your weight and don't be afraid to make mistakes. Hit your timelines so your group is not negatively affected.	Do calculus only.
INDEPENDENT WORK	Get your work done on time to the best of your ability. Ask about the things you have trouble with.	Get your work done on time to the best of your ability. Ask about the things you have trouble with.	Always follow safe mathematical practices.
ASSESSMENTS	Keep silent. Do not share or receive information about assessments.	Do not write after time is over. Put your test face up in the yellow basket.	Do not do anything that might appear to be academic dishonesty.
