

STEAM Sandcastle

FACT:

The tallest and longest sandcastles ever built in the United States of America were constructed at Myrtle Beach, South Carolina.

The longest sandcastle was measured at 10 ½ miles, and the tallest sandcastle was measured at 32 ½ feet.

Directions:

- Create a place value chart with the longest and tallest sandcastle
 - Longest: 665,280 in
 - Tallest: 390 in
- Give word form and expanded form of both the longest and tallest sandcastle

For above and beyond:

Research facts about how sandcastles are made.

Add the STEAM

S: we learned a scientific fact about the longest and tallest sandcastle

T: we used technology to look up pictures and facts

E: we engineering a place value chart

A: we created an artistic poster

M: we created a place value chart and gave the word form and expanded form
