Chino High's refurbished baseball stadium was ready for use March 22 with the Cowboys taking on Diamond Bar High, marking the first home baseball game for Chino High this season. Facing Jefferson Avenue, adjacent to the baseball field, is a new softball field. A concession stand, storage facility and restrooms will soon be built just south of the fields. The site work is included in phase zero of the school's reconstruction project, which will be done in two additional phases. Final completion is expected by 2022. Funding for the project is from the \$750 million Measure G school construction and modernization bond passed by voters in 2016.
