Greetings All,

I would like to extend a warm welcome to all new and returning students and parents/guardians of Magnolia Junior High and my classroom. I am excited to have the opportunity to work with our students this year as they learn the concepts and standards of Integrated Math I.

As you may be aware, this is an honors math course, without the distinction on your student's schedule. My main goal is to challenge your student in class and at home. This class will work at a fast pace as there are many lessons to cover and keep in mind, many of the students in this class are enrolled in Honors Integrated Math II as freshmen, next year.

Integrated Math I students are expected to maintain a C or higher, each trimester. A student earning a grade below a C, may be moved to Math 8 at the end of the first or second trimester. Students earning below a B in third trimester, will not be recommended for Integrated Math II Honors for the 9th Grade.

Please review the attached information with your student and feel free to contact me with any questions or comments you have as we kick off the school year.

Assignments:

Assignments should be expected daily. Each day, students will have time to start the homework in class. The homework practice is meant to give students an idea of what they will be tested on. An assignment is considered complete when all problems have been done and the necessary steps to complete each problem are clearly shown. Homework will only be accepted for credit if it is turned in within one or two days of its due date. If late, partial credit will be given. Students will receive a paper copy of nearly all assignments and a copy will be posted on google classroom. Online assignments will also be given. *Please note: Overall student grades are not kept in Google Classroom. Overall student grades are visible in Aeries Gradebook.

Topics of Study:

1. Equations & Inequalities
2. Linear Relationships & Functions
3. Systems of Equations
4. Real Numbers & Exponent Rules
5. Pythagorean Theorem
6. Transformations
7. Angle Relationships

Grading:

Grading will be based on the following. Also shown is the weighted average on the final grade of each component:

- Tests – 75%
- Homework/Classwork/Participation – 25%

A grade may be affected because of cheating. A student who is found to be cheating shall receive an "F" grade on the assignment, project, test, or any other activity where the cheating occurred.

Communication:

I regularly make myself available to students **before and after school** for additional support as requested by students. Please encourage your students to come and see me if they need any help.

Also, please sign up for the **Aeries Parent Portal** and download the app to have real time grades of your students including the ability to see if any/all assignments have been turned in. Class grades are updated regularly.

Class Materials:

The following is a list of **highly suggested items** students should bring to class each day (not including a pencil and eraser).

- 1) *******Scientific Calculator*******
- 2) *******6 or 12-inch ruler *******
- 3) **Highlighters**
- 4) **Color Pencils**
- 5) **2-inch binder (for all classes)**
- 6) **Student Agenda**

Discipline:

I follow the Magnolia progressive discipline procedures outlined in the student agenda.

Here's to a great year,

Jennifer Levario
