Please sit in the middle section and in front of the row where all the tables are up.

SIGN IN SHEET IS GOING AROUND!

- Look for your name, it is in ABC order by last name. IF for ANY reason, your name is NOT on the list, please add it to the last page with blank lines.
- Perfect attendance = prizes, do **NOT** forget to sign in at **EACH** class! © You also get prizes for coming to 7 or 6 of the 8 sessions!

Political Geography and Processes

UCR AP Readiness November 16, 2019

Miss Cisneros -or- Miss C

Remind (app or text #81010): @UCRAPHuG

Things to Note!

- Eating in Class: Please clean up after yourself!
- Restrooms: Located in the back of this classroom/lecture hall.
- Expectations of Behavior: Be an excellent reflection of your high school. © Be on time, respectful, stay off your electronics.
- •UCR AP Readiness Breaks: Keep aware of time, stick to areas near your classes. ©

UCR AP Readiness: What is it?!

Things to Know!

UNIT 4 POLITICAL PATTERNS & PROCESSES

POLITICAL GEOGRAPHY

- Independent states are the primary building blocks of the world political map
- Types of political entities include nations, nation-states, stateless nations, multinational states, multistate nations, and autonomous and semiautonomous regions, such as American Indian reservations

POLITICAL PROCESSES

- The concepts of sovereignty, nation-states, and selfdetermination shape the contemporary world
- Colonialism, imperialism, independence movements, and devolution along national lines influenced contemporary political boundaries

POLITICAL POWER

- Political power is expressed geographically as control over people, land, and resources, as illustrated by neocolonialism, shatterbelts, and choke points
- Territoriality is the connection of people, their culture, and their economic systems to the land

POLITICAL BOUNDARIES

 Types of political boundaries include relic, superimposed, subsequent, antecedent, geometric, and consequent boundaries

FUNCTION OF BOUNDARIES

- Boundaries are defined, delimited, demarcated, and administered to establish limits of sovereignty, but they are often contested
- Political boundaries often coincide with cultural, national, or economic divisions. However, some boundaries are created by demilitarized zones or policy, such as the Berlin Conference
- Land and maritime boundaries and international agreements can influence national or regional identity and encourage or discourage international or internal interactions and disputes over resources
- The United National Convention on the Law of the Sea defines the rights and responsibilities of nations in the use of international waters, established territorial seas, an exclusive economic zones

FORMS OF GOVERNANCE

- · Forms of governance include unitary states and federal states
- Unitary states tend to have a more top-down, centralized form of governance, while federal states have more locally based, dispersed power centers
- Voting districts, redistricting, and gerrymandering affect election results at various scales

DEVOLUTIONARY FACTORS

- Factors that can lead to the devolution of states include the division of groups by physical geography, ethnic separatism, ethnic cleansing, terrorism, economic and social problems, and irredentism
- Devolution occurs when states fragment into autonomous resgions
- Centrifugal forces may lead to failed states, uneven development, stateless nations, and ethnic nationalist movements
- Centripetal forces can lead to enthnonationalism, more equitable infrastructure development, and increased cultural cohesion

CHALLENGES TO SOVEREIGHTY

- Global efforts to address transnational and environmental challenges and to create economies of scale, trade agreements, and military alliances help to further supranationalism
- Suprantational organizations can challenge state sovereignty and include the UN, NATO, EU, ASEAN, Arctic Council, and African Union

Our Focus

POLITICAL GEOGRAPHY

- Independent states are the primary building blocks of the world political map
- Types of political entities include nations, nation-states, stateless nations, multinational states, multistate nations, and autonomous and semiautonomous regions, such as American Indian reservations

POLITICAL PROCESSES

- The concepts of sovereignty, nation-states, and selfdetermination shape the contemporary world
- Colonialism, imperialism, independence movements, and devolution along national lines influenced contemporary political boundaries

Which country is the oldest?

The Republic of San Marino

It's a micro state

Which area governs itself but is NOT an independent country?

Greenland

Which 2 African countries were never completely claimed by other countries? Liberia and Ethiopia*

*Although during WWII, Italy did occupy this country....

In what year was the last African country decolonized/independent?

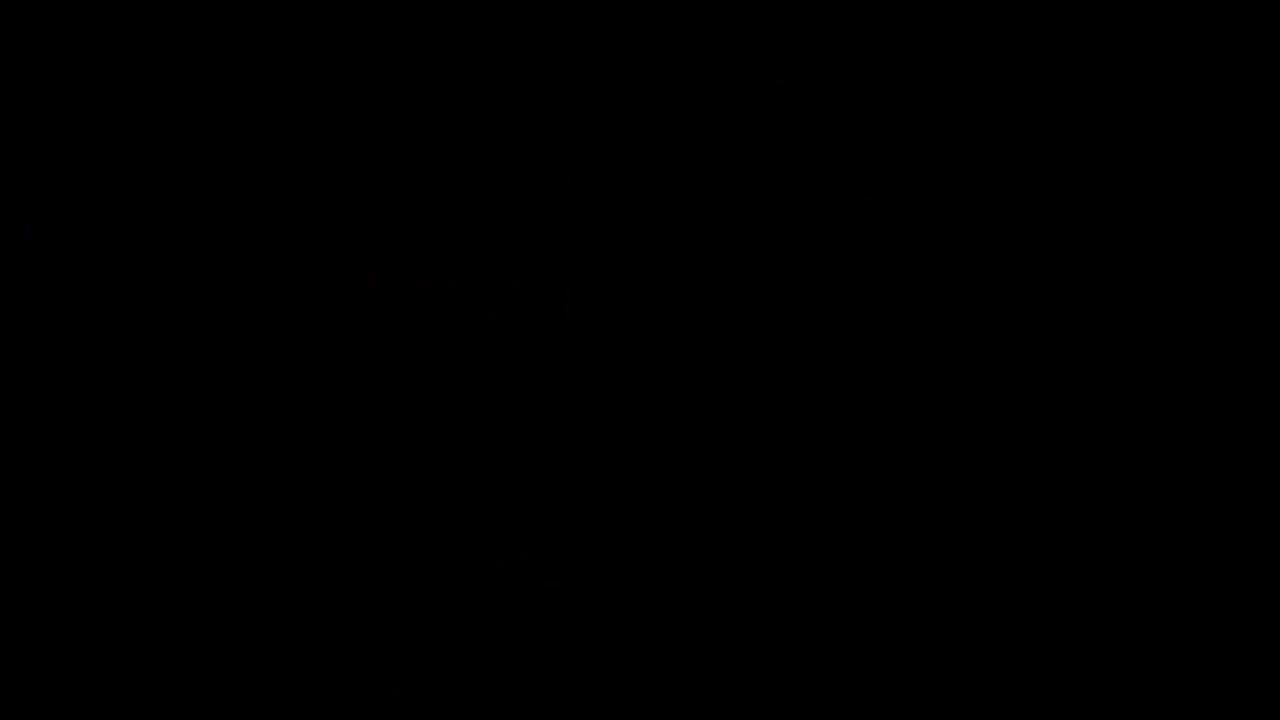

1960

What is the newest country in the world?

South Sudan
Established in 2011

Geography is important!

State:

 An area of land (political) unit) with a permanent population and boundaries that are recognized by other states that allows for the administration of laws, collection of taxes, and provision of defense.

Not to be confused with the "state" of California...In official GEOGRAPHY, state = country.

Nation

 A group of people who think of themselves as ONE based on a shared sense of culture and history and who desire political autonomy. In other words, an ethnic group and the land they live on.

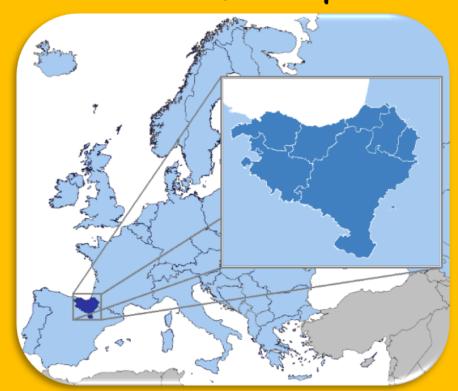

STATE

A state is an independent political and entity with clear geographic boundaries

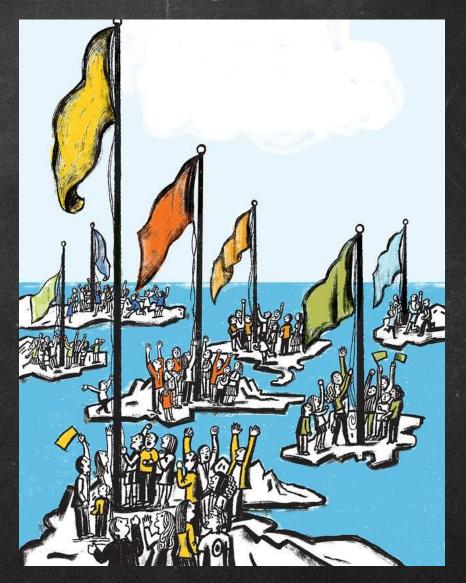

NATION

A nation is a large population that shares the same culture, language, traditions, history...

Nation-State

 A state with a single nation in it (VERY few of these exist). For the most part, these are countries where more than 90% of the total population is of one ethnicity.

- Kurds

- Catalans

Nation-State

- Japan

- Iceland

- Canada

- Peru

Nation

State

Multinational State

A state
 with two
 or more
 nations.

Stateless Nation

 A group of people with a common culture occupying a particular territory that does not operate as an independent political unit.

THE KURDS ONE NATION, FOUR COUNTRIES

Multistate Nation

 When a nation has a state of its own BUT it stretches across border of other states.

 Not as typical: bi-national state, meaning a state with just TWO nations.

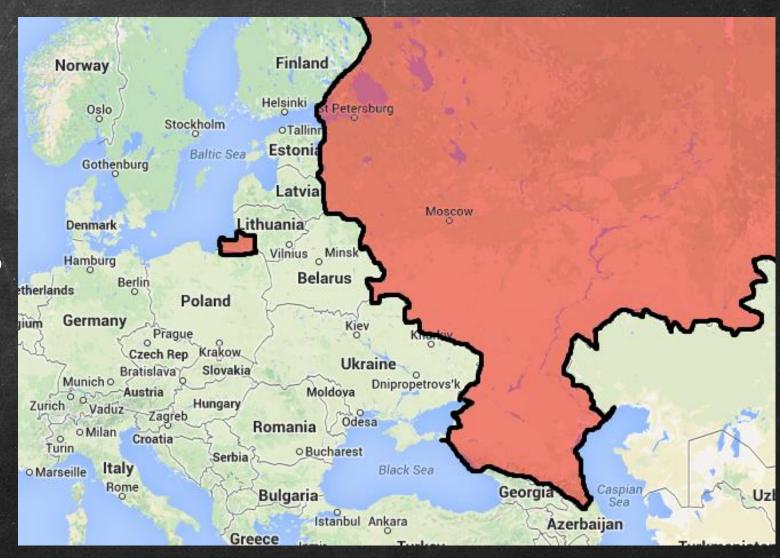

Irredentism

When one state/country seeks to annex territory in another state because it has ties to part of the population that lives there.

Exclave

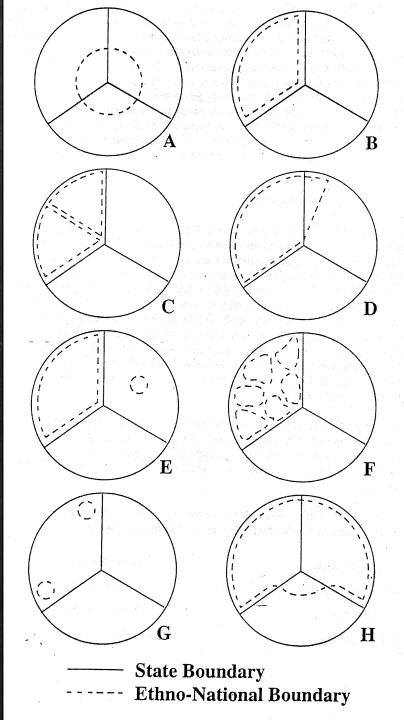

• When a state is fragmented and part of their state is surrounded by another state.

Enclave

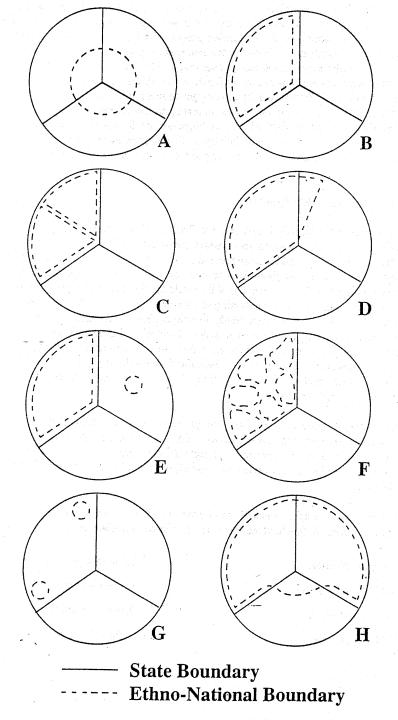

- When one state or nation is surrounded by another state or nation.
- Ethnic enclaves can be found in large urban areas as well.

On a piece of paper, draw these circles. Try to make the boundaries like that in the key at the bottom.

We will go over what the terms go with each, as well as examples for each.

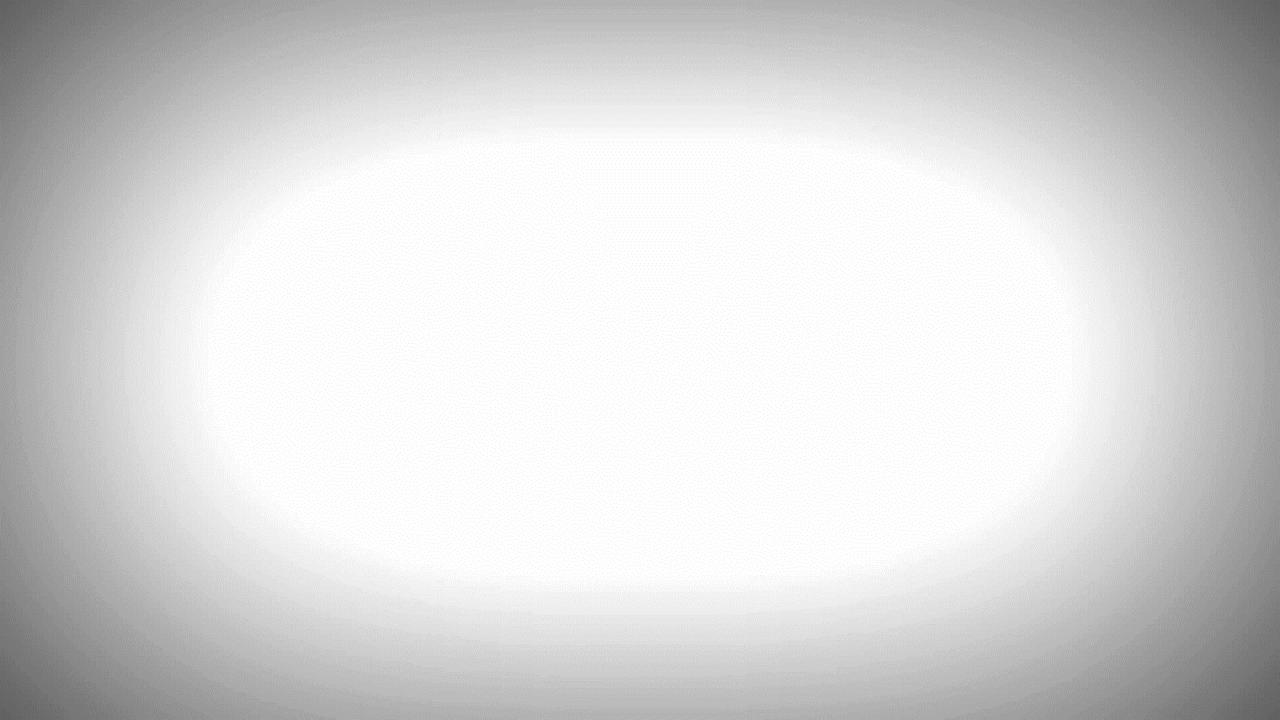

- **A Stateless Nation Ex: Kurds**
- **B Nation-State Ex: Japan**
- C Binational State Ex: Israel (Israelis and Palestinians)
- D Irredentism Ex: Albania Kosovo
- **E Exclave** Ex: Kaliningrad → Russia
- F Multinational State Ex: United States
- **G Ethnic Enclave Ex: Native Americans in U.S.**
- H Multistate Nation Ex: North & South Korea

But could these concepts of states and nation state be erasing...

...because we like in a more interconnected and globalized world?

Autonomous Region:

 An area which governs itself BUT is not an independent country.

• Examples: Greenland, Hong Kong

Semi-autonomous Region:

 An area which can govern itself in certain areas, but does not have complete power to govern.

• Examples: Nunavut in Canada, Indian Reservations in the United States.

Sovereignty:

• Final authority over a territory and the right to defend territorial integrity against invasion.

Self-Determination

- The process by which a country determines its own statehood and forms its own allegiances and government.
- Example: Catalonia wants self-determination AND sovereignty.

Colonialism

- the policy or practice of acquiring full or partial control over another country, occupying it with settlers, and exploiting it economically.
- Started in 16th century (1500s), right after 1492 (Columbus).
- Portuguese and Spanish were known for colonizing countries in the New World (Latin America, Florida, California) during this time.
- They came in and completely took over countries most Latin American countries were Spanish colonies.

Imperialism

- a policy of extending a country's power and influence over another country through diplomacy (talks, negotiations) or military force
- Started in 19th century (1800s) AFTER the Industrial Revolution.
- European countries, the U.S., and Japan imperialized (took over other countries). These were either colonies, spheres of influence or protectorates. (More on THAT in World History).
- The countries they took over became known as their "empire"
- Britain took over the most countries around the world
 - "the sun never sets on the British Empire"
 - basically, they had land in every time zone

Neat Sources for AP HuG Connections!

On Instagram or Facebook:

- World Economic Forum
- Global Citizen
- National Geographic
- United Nations They have a TON of sub IG groups like: Human Rights, Refugees, Gender, Climate...and so on!

Student Evaluation

http://bit.ly/UCR1116 Last name: Cisneros

Please do the survey and suggest topics! We want to help you as much as we can. Doing 1 survey after each class helps all of us!
