The main difference between the ELPAC training test and the ELPAC practice test is that the training test helps students learn the interface and accessibility resources, while the practice test helps students become familiar with the test structure and format:

ELPAC Training Test

Helps students become familiar with the testing interface and accessibility resources. Training tests are organized by grade bands, such as 3–5, and allow parents to preview the test format.

ELPAC Practice Test

Helps students become familiar with the test structure and format. Practice tests are available for each grade level and span, and provide students with a full-length test experience. Practice tests do not produce scores.

Students will take 4 different tests in total.

Initial ELPAC and Summative ELPAC

The following are key differences to consider when using these practice test and training test resources to prepare for the Initial ELPAC and Summative ELPAC:

- The online ELPAC practice tests can be used to prepare for either the Initial ELPAC or the Summative ELPAC. The online ELPAC practice tests are based on the full-length Summative ELPAC. However, these practice tests can also be used to prepare students for the Initial ELPAC since the task types used in the Initial ELPAC are a subset of the task types appearing in the Summative ELPAC.
- The following task types appear on the Summative ELPAC and do not appear in the Initial ELPAC:
 - Speaking: Present and Discuss Information
 - Reading: Read a Student Essay
 - Writing: Write About Academic Information
- The Initial ELPAC is combined for grades nine through twelve. Students may use the ELPAC practice test for grade span nine and ten or grade span eleven and twelve to prepare for the Initial ELPAC.
