Body Systems Foldable

1. Make a Layered-Look Book with 6 sheets of colored or construction paper. Staple or glue papers together. Alternate colors of paper used.

2. Place the title “Body Systems” on the top layer.
3. Label each layer with the body systems:
   a. Respiratory System
   b. Circulatory System
   c. Nervous System
   d. Endocrine System
   e. Immune System
   f. Reproductive System
   g. Excretory System
   h. Digestive System
   i. Muscular System
   j. Skeletal System
   k. Integumentary System

4. Cut out the pictures and paste on the appropriate layer.
5. For each system, write about its:
   a. Function
   b. How it works, and
   c. Include how it works with another body system.

Example:

Function: To take in oxygen and transport it to cells.

How it works: Air enters through the mouth and nostrils and travels to the lungs. Here it works with the circulatory system to move oxygen into the blood, and to the cells. Waste is transferred from the blood, and back to the respiratory system in the form of carbon dioxide that is then exhaled through the mouth and nostrils.
