Description of Course - Students in grade nine or ten study major turning points that shaped the modern world, from the late eighteenth century through the present, including the cause and course of the two world wars. They trace the rise of democratic ideas and develop an understanding of the historical roots of current world issues, especially as they pertain to international relations. They extrapolate from the American experience that democratic ideals are often achieved at a high price, remain vulnerable, and are not practiced everywhere in the world. Students develop an understanding of current world issues and relate them to their historical, geographic, political, economic, and cultural contexts. Students consider multiple accounts of events in order to understand international relations from a variety of perspectives.

Rationale for Course - To be an informed citizen in today's United States, one must be aware of the world that we live in and the events that shaped today's world. As citizens of the twenty-first century our students will be more international than national, and as a result will need to understand where the United States fits in and how we are perceived by other nations. To do this one must be aware of the history of the twentieth century where we went from being one of a few world powers, to being the only superpower. To do this one must be aware of the history of the twentieth century where we went from an agricultural-industrial nation to a post-industrial nation.
