## AI INFORMATION

Generative AI tools must be used ethically, responsibly, and intentionally to support student learning, not to bypass it.

**Accordingly, all work must be the student's own work.** While students are permitted to use generative AI tools consistent with this policy, their use is optional and not mandatory.

Students can use generative AI tools as optional aids for exploration of potential topics of inquiry, initial searches for sources of information, confirming their understanding of a complex text, or checking their writing for grammar and tone. However, students must read primary and secondary sources directly, perform their own analysis and synthesis of evidence, and make their own choices on how to communicate effectively in their presentations. It remains the student's responsibility to engage deeply with credible, valid sources and integrate diverse perspectives when working on the project.
