

Welcome to 7th Grade Science!

I am very excited to get to know each of you throughout the upcoming year!
Please read the document below and bring back the signed portion
by _____.

Course Overview

The Science 7 course includes 4 units:

- ★ Matter All Around
- ★ Matter Cycles & Energy
- ★ Shaping Earth's Resources and Ecosystems
- ★ Sustaining Ecosystems

Mrs. Lane

7th Grade Science Teacher
cheryl_lane@chino.k12.ca.us
909-464-9938

Required Supplies

The following supplies are to be brought to class each day.

- Pencils
- Charged Chromebook
- Binder with agenda (at least 1" thick)

Classroom Rules All students are expected to be **present, engaged,** and **respectful** each day.

Lab Expectations Students are expected to follow lab safety guidelines. Misuse of materials or unsafe practices may result in a failing grade and/or removal from future labs.

Grades & Attendance If students are absent, they are responsible for completing make-up work (one day for make-up for each day absent). This can be done before or after school or via email/Google Classroom. Grading follows: 60% projects, labs, test and quizzes. 40% classwork, class participation and homework.

Late Work Late work is not accepted without a token. Tokens can be earned by completing extra assignments (current events, or other related content). Students can bank their tokens to use when an assignment is late. This can also be used to resubmit an assignment for an improved grade.

I have read and understand Mrs. Lane's classroom syllabus & expectations for Science 7.
