

WKST PERIOD AND SINE FUNCTIONS

Standard Form: $y = a \sin(bx - c) + d$

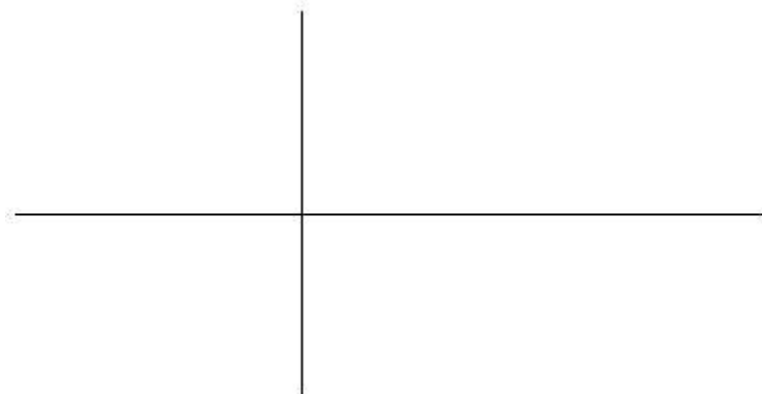

Amplitude:

Period:

Phase Shift:

Initial Interval:

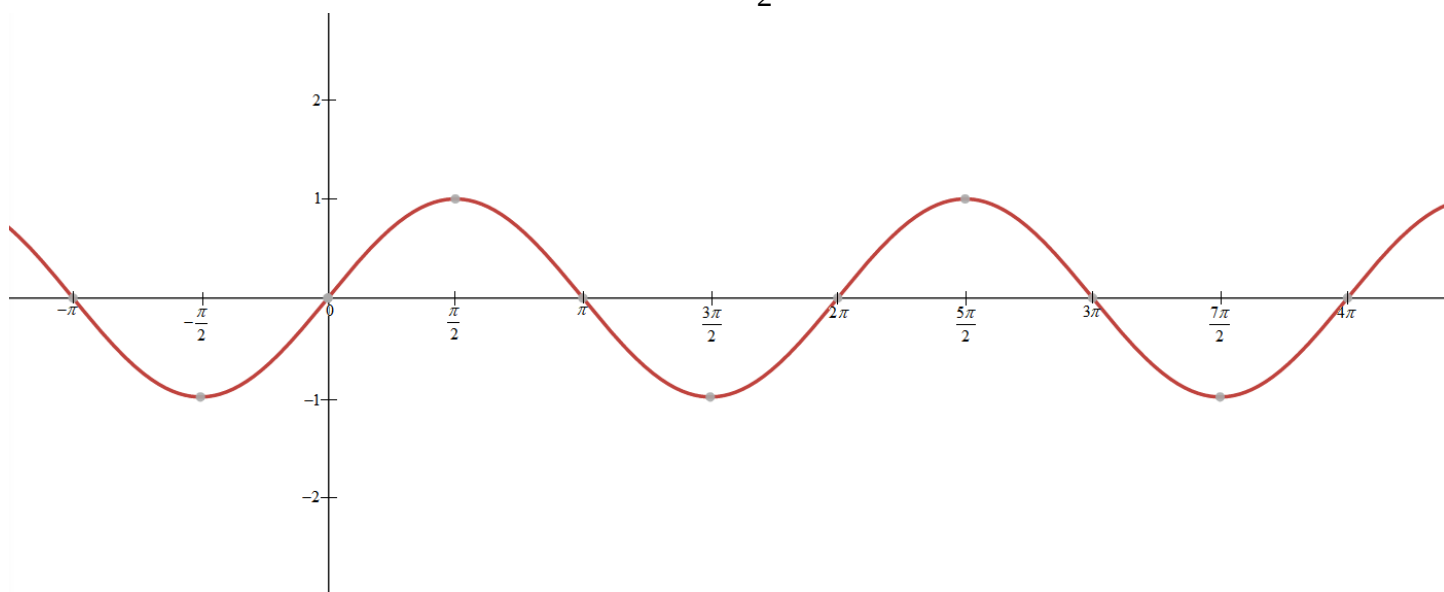

Parent Function $y = \sin x$

Practice Problems: Graph each of the following on the same x and y axis as the parent function shown. The objective is to see the difference in the two functions, so both need to be on the same plane.

1.

$$y = \sin \frac{x}{2}$$

Amplitude:

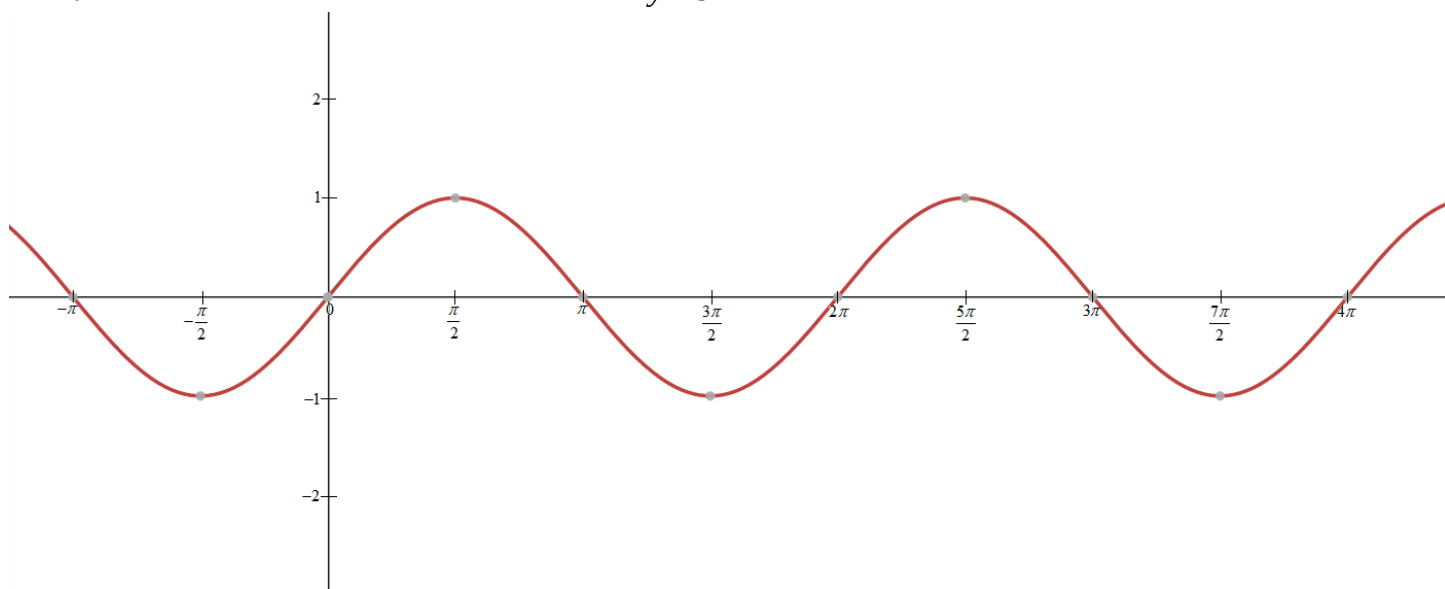

Period:

Phase Shift:

Initial Interval:

2.

$$y = \sin 2x$$

Amplitude:

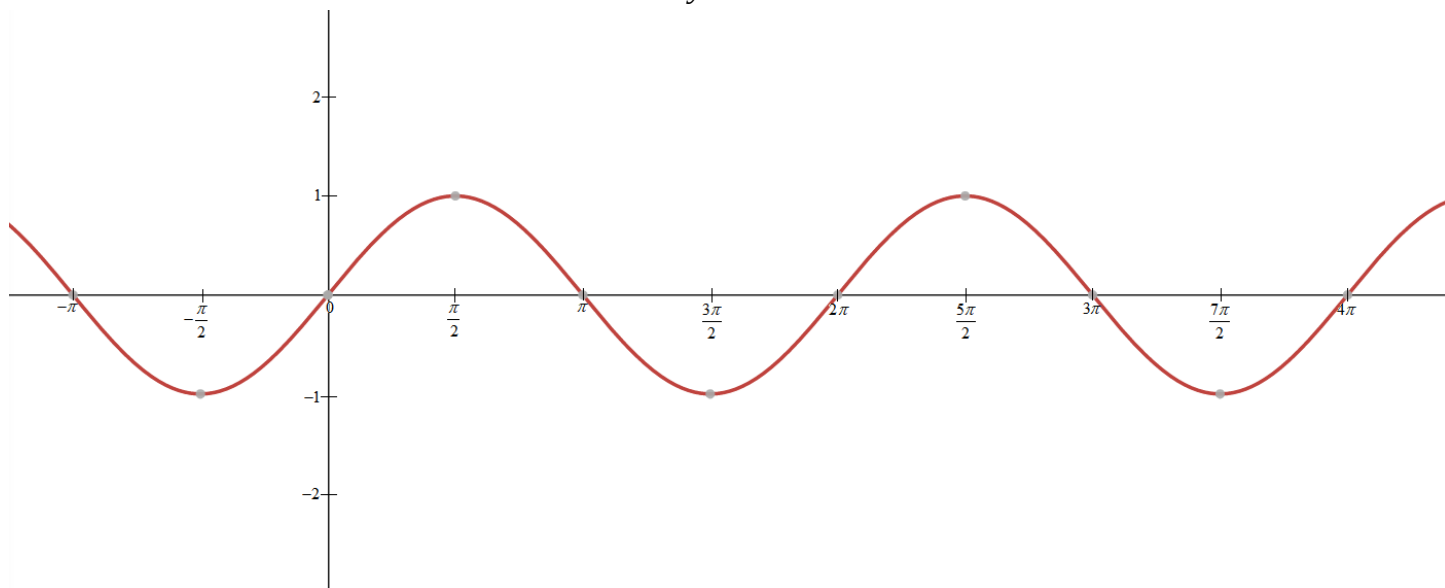

Period:

Phase Shift:

Initial Interval:

3.

$$y = \sin 4x$$

Amplitude:

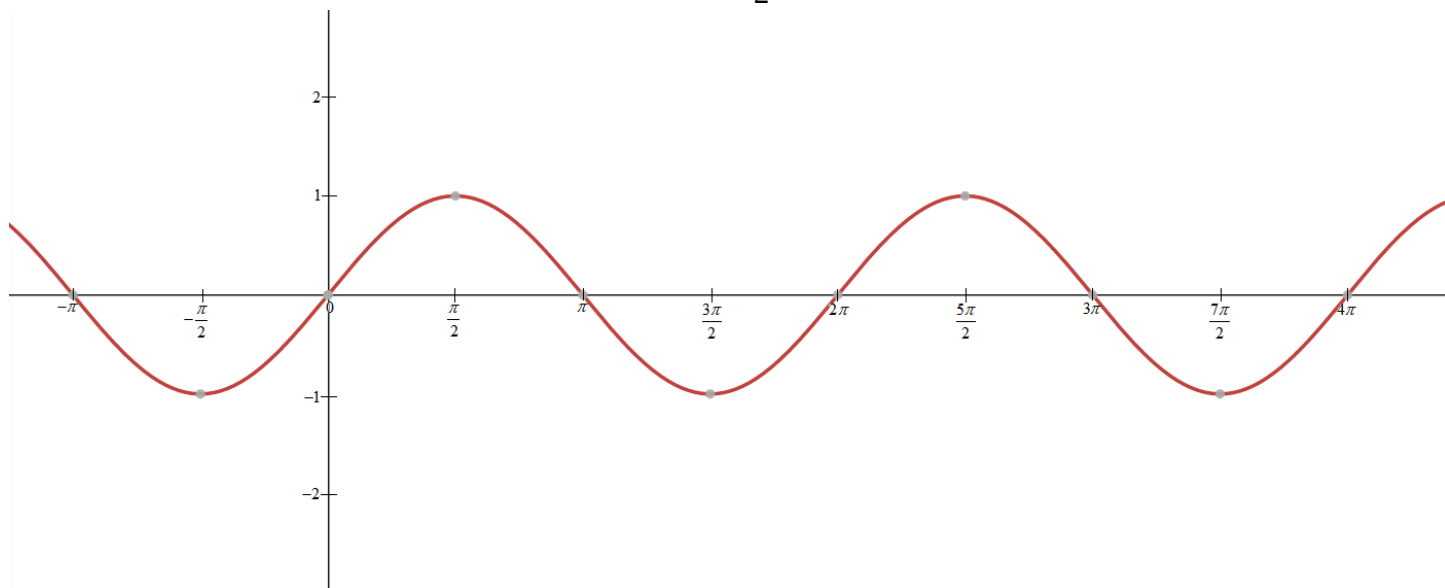

Period:

Phase Shift:

Initial Interval:

4.

$$y = 2\sin \frac{x}{2}$$

Amplitude:

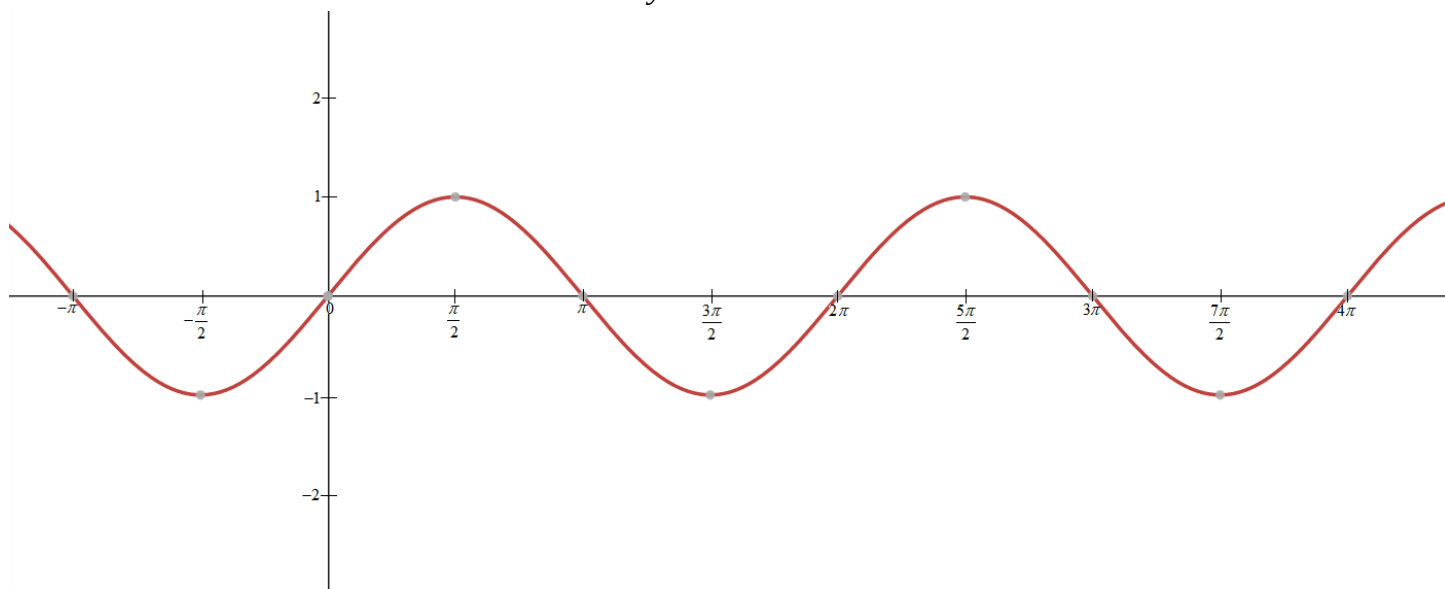

Period:

Phase Shift:

Initial Interval:

5.

$$y = -2\sin 2x$$

Amplitude:

Period:

Phase Shift:

Initial Interval:
